第三年的目标，是建立具有平衡的苹果供应、包括针对管理阶层、中间商的促销活动和创建消费者对于苹果的需求。我们利用媒体、公关、网络等多种方式影响消费者的意识。我们的目标是：让中国，阿联酋等市场消费者能够享受欧洲苹果的美味。

ENJOY

The third year goal is to balance the task of building apples supply – activities addressed to managers and mediators, with the creation of an adequate demand for apples among consumers. We reach consumers through comprehensive activities in media, PR, and the website. The aim of these activities is to make the recipients from China and United Arab Emirates enjoy the taste of European apples.

欧洲苹果：发现，选择，享受！

EUROPEAN APPLES: DISCOVER, CHOOSE AND ENJOY!

发现

欧洲的气候特别适合苹果的生长。欧洲苹果远离大城市，随时接触新鲜的空气和温暖的阳光，其腮红明显果肉多汁，松脆可口，特别适合当作健康食品：含有丰富的粗饲料，无麸质和转基因生物成分*。

DISCOVER

Europe has an ideal climate for apples production. Apples grown in Europe are grown far from large cities, they breath fresh air and bath in the warm sunrays. Apples have full blush and juicy flesh, and additionally, they are crispy and aromatic. Apples are recommended in human diet – they are rich in fiber, gluten free and GMO free*.

选择

欧洲苹果多样化，能满足各种消费者的要求，使其体验到新的口味。当消费者尝试欧洲特殊地区（比如：格鲁耶茨 [GRÓJEC]）种植的苹果，他们会发现特殊气候、土壤条件和多年经验得来的种植技术创造的细腻酸甜口味。欧洲的果农越来越多使用天然施肥、保护及防治害虫的方法。

CHOOSE

The multitude of varieties of European apples will satisfy the tastes of all consumers and will give them an opportunity to have new taste experience. When they reach out for the apples grown in special regions of Europe, like Grójec, they will discover a gentle sweet and sour touch created as a composition of exceptional climatic and soil conditions connected with elaborately developed cultivation methods. In Europe more and more frequently biological methods of fertilization and protection and natural methods of fighting the pests are applied.

享受

重要的是，这些苹果必需符合质量控制、包装、运输的严格欧洲标准。享受全球最受欢迎水果的美味吧！这不仅是巧合！

ENJOY

What is very important, apples are subject to restrictive European standards relating production control and high storage and transport standards. Enjoy the taste of the most frequently chosen fruit in the world! It is no accidental!

质量要求 QUALITY REQUIREMENTS

栽培

欧洲的苹果栽培于清洁的远离大城市之地。优质土壤、气候条件和栽培水果的传统技术，使这里的水果成为旧世界之骄傲。可是，如果没有热爱自己工作的果农，这些苹果也就长不出来了；有他们的努力，全世界的人才能品尝到这美味食物。

CULTIVATION

European apples grow on clean areas away from big cities. Excellent soil and climatic conditions and fruit-growing traditions make that these fruits are the real pride of the old continent. Behind the success of apples are always the growers – people with real passion. Thanks to their involvement people all over the world can enjoy this tasty snack.

储存

我们使用最现代的冰柜，包括带有CA、ULO、DCA空调系统的冰柜。由于氧气含量降低，苹果进入休眠状态，其引起内部代谢过程减慢，并延缓苹果成熟。这样我们可以不用化学防腐剂，在自然环境中将苹果库存到12个月！

STORAGE

We have the most modern refrigerating rooms, also with controlled atmosphere in CA, ULO and DCA systems. Due to a reduced oxygen content, apples are hibernated which results in the slowing down of the fruit metabolism processes – slowing down of the ripening process. Due to that, we can store apples in a natural environment without chemicals for nearly 12 months!

水果分拣

新采摘的苹果，用专门创新的设备来分拣。设备将水果旋转，并对其进行自动分析：其系统能够识别水果的大小、颜色、重量以及有可能的内部受损。设备还具备 IFA (Internal Flavour Analyzer, 内部芳香分析器)。

SORTING

Freshly picked European apples are sorted by innovative system. Fruits are rotated and analyzed by machines. The system recognizes size, color, weight and possible internal damage. These devices are also featured with a IFA system – Internal Flavour Analyzer.

包装

分拣后的苹果，可以用各类塑料、木头、纸制包装，也可以用小托盘、网袋等包装。如果客户要求，苹果还可以上天然蜂蜡。

PACKING

After being sorted, the apples can be packed in any type of packages: plastic, wooden, cardboard, as well as on trays, in nets and bags. At a request, apples can be covered by natural bee wax.

运输

高品质的欧洲苹果到达越来越遥远的市场。目前要求摄氏度2-4（华氏度36-39）冷藏运输。这样，苹果可运到遥远的市场，并包装后8个星期还能保持新鲜。

DELIVERY

European apples are supplied to more and more distant markets in a very good trade and consumption condition. Cold store transport is required in temperature ca. 2 – 4°C (36 – 39 Fahrenheit). Apples are fresh and ready for transport and sale on far markets even up to eight weeks from the date of shipment.

质量控制

欧洲生产商特别重视其苹果的高品质。详细的水果检查流程包括几个阶段：水果园运进来的苹果初步验收、专门系统进行的分拣、发货前的最终验收等，保证苹果能保持新鲜的外观及香味，并不含任何有害的物质。

QUALITY CONTROL

European producers take special care to make their apples always be of high quality. Detailed fruit control consists of several steps – starting with the acceptance process of apples from the orchard by sorting using specialized systems until the final inspection before the shipment. Thanks to that every recipient can be sure that fruits look and taste like at the moment they were picked from the tree and they are free from dangerous substances.

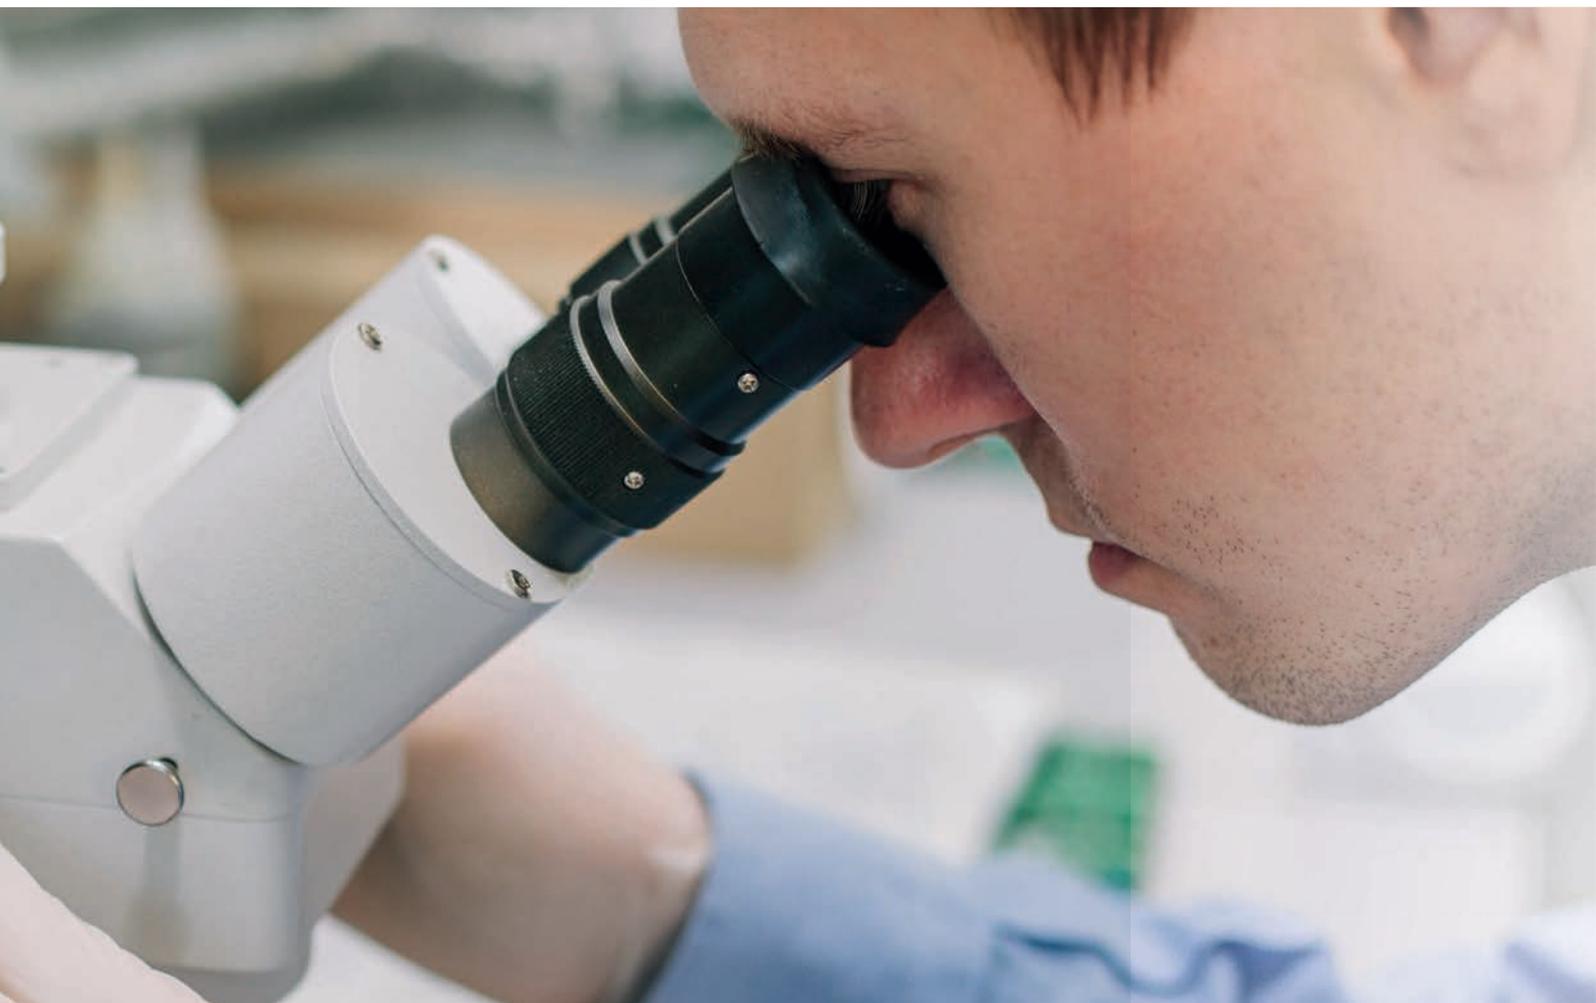

欧盟苹果安全标准

欧洲的产家特别重视生产流程，尤其是这个流程对于环境和对消费者的安全。栽培的苹果满欧洲高标准，不含农药和化肥的残留物。

SAFETY STANDARDS OF APPLES IN THE EU

European producers attach great importance to production methods – modern and safe for the environment and consumers. Cultivated apples meet high EU standards. Apples are free from residues of pesticides and fertilizers.
